(54) Title: OPTIMISATION OF MIDI FILE REPRODUCTION

WO 2004/090862 A1

(57) Abstract: A method for adapting a score stored in a MIDI file for being reproduced on a mobile terminal to the transfer function of an electroacoustic reproduction circuitry is provided. Hereby, a test rendering of the score for to obtain sampled data is performed prior to a reproduction of the score on the mobile terminal. From these sampled data, one or more values and/or combination of values important for a desired electroacoustic reproduction on the mobile terminals are identified, and based on these identified values, one or more parameters suited for adapting the score with respect to the desired or optimised reproduction on the mobile terminal are determined.
